R. L. Parker, PhD, *IGPP, A0205, University of California, San Diego, La Jolla, California 92093, USA.*
D. M. Willis, PhD, *Appleton Laboratory, Ditton Park, Slough SL3 9JX.*

The *Geophysical Journal of the Royal Astronomical Society* accepts papers on all geophysical subjects; work on the upper atmosphere is included when it is associated with the Earth, as for example magnetic effects at the Earth due to upper atmosphere occurrences. Review articles are included, together with summaries of palaeomagnetic observations, letters to the editors, research notes and book reviews. Papers containing a high proportion of diagrams or tabular material, however, may be published in microfiche form only, with an extended summary appearing in standard print.

Geophysical Journal is published on the first day of each month; three issues constitute a volume, so that there are four volumes each year. The Royal Astronomical Society also publishes the *Quarterly Journal* and *Monthly Notices of the Royal Astronomical Society.*

All the Society's journals are published by *Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL, UK.*

Subscription orders and all correspondence and remittances relating to subscriptions should be addressed to the publishers, with the exception of orders etc., from members of the Society, who should communicate direct with the Executive Secretary of the Society. *A list of subscription rates appears at the end of each volume.*

Back numbers of volumes of *Geophysical Journal* published from 1958 to February 1973 (Volumes 1–31) should be ordered from the Society; orders for Volume 32 (March 1973) and following should be sent to the publishers.

This journal is covered by *Current Contents.*

Royal Astronomical Society

The interests of the Royal Astronomical Society cover the whole field of astronomy, geophysics and the solar-terrestrial environment. Members of the Society may buy *Geophysical Journal* and *Monthly Notices* at a reduced price. They also receive *Quarterly Journal* free of charge. In addition, members have the use of an extensive Astronomical and Geophysical library.

Enquiries concerning membership of the Society should be addressed to *The Executive Secretary, Royal Astronomical Society, Burlington House, London W1V 0NL, UK.*

Geophysical Journal of the Royal Astronomical Society

The subscription cost of the *Journal* in 1978 is as follows:

to Libraries and Institutions	in the UK	£125.00
	outside the UK	£150.00 (US $300.00*)
to individuals resident outside the United Kingdom who certify that the *Journal* is for their personal use only		£30.00 (US $60*)
to Fellows of the Royal Astronomical Society		£16.00
to Junior Members of the Society		£5.00

The prices of back numbers of the *Journal* are:

Vols 1–31 (1958–December 1972), obtainable from the Royal Astronomical Society	£15.00 per volume
Vols 32–55, obtainable from Blackwell Scientific Publications Ltd	
Vols 32–35	£30.00 ($75.00)
36–39	£30.00 ($75.00)
40–52	£30.00 ($75.00)

* This price applies to North America and includes the cost of accelerated surface post.

Membership of the Royal Astronomical Society

The annual contributions payable by members of the Royal Astronomical Society in 1978 are:

by Fellows aged 30 years and over	£18.00
Fellows under 30 years old	£12.00
Junior Members	£5.00

at 1978 January 1

GEOPHYSICAL JOURNAL AUTHOR INDEX FOR THE YEAR 1978

AGNEW DUNCAN CARR, FARRELL W.E. Self-consistent equilibrium ocean tides 55 171
AGRAWAL R.C. The GH branch of PKP from deep-focus earthquakes..... 53 459
AGRAWAL R.C. S times from deep-focus Indian earthquakes..... 54 461
AKASOFU S.-I., PERREAULT PAUL A study of geomagnetic storms..... 54 547
AKI KEIITI, MENDIGUREN JORGE A. Source mechanism of the deep Colombian earthquake of 1970 July 31 from the free oscillation data..... 55 539
ALCOCK G.A., CARTWRIGHT D.E. Some experiments with 'orthotides' 54 681
ALVAREZ WALTER, LOWRIE WILLIAM Upper Cretaceous palaeomagnetic stratigraphy at Moria (Umbrian Apennines,Italy): verification of the Gubbio section..... 55 1
AMANO MASAO, KONO YOSHITERU Thickening model of the continental lithosphere..... 54 405
AMBRASEYS N.N. The relocation of epicentres in Iran..... 53 117
ANDERSON ROGER N., HOBART MICHAEL A., VON HERZEN R.P., FORNARI DANIEL J. Geophysical surveys on the East Pacific Rise-Galapagos Rise system.... 54 141
ANDERSSEN R.S., WANG C., CLEARY J.R. Ray-mode duality for SH waves in earth models with crust and upper mantle discontinuities-I. The case of one discontinuity..... 54 297
ANDERSSEN R.S., CHANDLER G.A. The inverse eigenvalue problems of free oscillation data inversion: the Backus-Gilbert conjecture for angular-order spectra..... 55 311
ANSELL J.H. On the scattering of SH waves from a point source by a sphere..... 54 349
ARCHAMBEAU C.B., MINSTER J.B. Dynamics in prestressed media with moving phase boundaries: a continuum theory of failure in solids..... 52 65
ASSUMPCAO M., BAMFORD D. LISB-V. Studies of crustal shear waves..... 54 61
ATKINSON B.K., RUTTER E.H., MAINPRICE D.H. On the use of the stress relaxation testing method in studies of the mechanical behaviour of geological materials..... 55 155
BAILEY R.C., EDWARDS R.N., GARLAND G.D., GREENHOUSE J.P. Geomagnetic sounding of Eastern North America and the White Mountain heat flow anomaly..... 55 499
BAMFORD D., NUNN K., PRODEHL C., JACOB B. LISB-IV. Crustal structure of Northern Britain..... 54 43
BAMFORD D., ASSUMPCAO M. LISB-V. Studies of crustal shear waves..... 54 61
BANNISTER J.R., GOUGH D.I. A study of two polar magnetic substorms with a two-dimensional magnetometer array..... 53 1
BANNISTER J.R., GOUGH D.I. A polar magnetic substorm observed in the evening sector with a two-dimensional magnetometer array..... 55 435
BARCILON V. On the information content of natural frequency spectra associated with different angular numbers..... 53 623
BARRACLOUGH D.R., HARWOOD J.M., LEATON B.R., MALIN S.R.C. A definitive model of the geomagnetic field and its secular variation for 1965 -I. Derivation of model and comparison with the IGRF..... 55 111
BEAUMONT C. Tidal loading: crustal structure of Nova Scotia and the M2 tide in the northwest Atlantic from tilt and gravity observations..... 53 27
BEAUMONT CHRISTOPHER The evolution of sedimentary basins on a viscoelastic lithosphere: theory and examples..... 55 471
BEAVAN JOHN A note on the strains at a distance from an ellipsoidal inhomogeneity..... 54 713
BESKE-DIEHL SUZANNE, SHIVE PETER N. The rock magnetism of the Mississippian Madison Limestone north-central Wyoming..... 55 351
BIRD PETER Stress and temperature in subduction shear zones: Tonga and Mariana..... 55 411
BLOW R.A., HAMILTON N. Effect of compaction on the acquisition of a detrital remanent magnetization in fine-grained sediments..... 52 13
BOCCHIO F. Numerical computation of the three-dimensional normal ellipsoidal field with a 1/100 m and 1/100 mgal accuracy..... 55 503

BONAFEDE M., BOSCHI E. Energy release in faulting processes in a pre-stressed self-gravitating rotating Earth model..... 53 79
BOSCHI E., BONAFEDE M. Energy release in faulting processes in a pre-stressed self-gravitating rotating Earth model..... 53 79
BOSCHI E., FAZIO D., MULGARGIA F. Thermodynamical Gruneisen's function for pure iron at the Earth's core conditions..... 53 531
BOSCHI E., MULARGIA F. The generalization of the Mie-GruneIsen equation of state..... 55 263
BRETREGER K., MATHER R.S. Modelling ocean-landing effects on tidal gravity in Australia..... 52 241
BREWITT-TAYLOR C.R., WEAVER J.T. Improved boundary conditions for the numerical solution of E-polarization problems in geomagnetic induction. 54 309
BROBERG K.B. On transient sliding motion..... 52 397
BROWN F.H., SHUEY R.T., CROES M.K. Magnetostratigrphy of the Shungura and Usno Formations, southwestern Ethiopia: new data and comprehensive reanalysis..... 54 519
BUCUR ILEANA Experimental study of the origin and properties of the defect moment in single domain haematite..... 55 589
BULAND RAY, GILBERT FREEMAN Improved resolution of complex eigenfrequencies in analytically continued seismic spectra..... 52 457
BURCH R.F., USHER M.J., GURALP C. The design of miniature wideband seismometers..... 55 605
BURTON PAUL W. Perceptible earthquakes in the United Kingdom..... 54 475
BUSSE F.H. A model of time-periodic mantle flow..... 52 1
CANNON W.H. The classical analysis of the response of a long baseline radio interferometer..... 53 503
CARA MICHEL Regional variations of higher Rayleigh-mode phase velocities: a spatial-filtering method..... 54 439
CARDWELL R.K., CHINN D.S., MOORE G.F., TURCOTTE D.L. Frictional heating on a fault zone with finite thickness..... 52 525
CARTWRIGHT D.E., ALCOCK G.A. Some experiments with 'orthotides' 54 681
CHANDLER G.A., ANDERSSEN R.S. The inverse eigenvalue problems of free oscillation data inversion: the Backus-Gilbert conjecture for angular-order spectra..... 55 311
CHAPMAN C.H. A new method for computing synthetic seismograms..... 54 481
CHAPMAN MICHAEL, KAHLE HANS-GEPT, TALWANI MANIK Detailed IXI degree gravimetric Indian Ocean geoid and comparison with GEOS-3 altimeter geoid profiles..... 55 703
CHIARUTTINI C., LIVIERATOS E. Oceanic loading on European laser-ranging sites..... 54 593
CHINN D.S., CARDWELL R.K., MOORE G.F., TURCOTTE D.L. Frictional heating on a fault zone with finite thickness..... 52 525
CHUNG WAI-YING, KANAMORI HIROO Subduction process of a fracture zone and aseismic ridges-the focal mechanism and source characteristics of the New Hebrides earthquake of 1969 January 19 and some related events. 54 221
CLADWELL J.G., MCADOO D.C., TURCOTTE D.L. On the elastic-perfectly plastic bending of the lithosphere under generalised loading with application to the Kuril trench..... 54 11
CLARK R.M., THOMPSON R. An objective method for smoothing palaeomagnetic data..... 52 205
CLARKE G.K.C., PATERSON W.S.B. Comparison of theoretical and observed temperature profiles in Devon Island ice cap, Canada..... 55 615
CLEARY J.R., WANG C., ANDERSSEN R.S. Ray-mode duality for SH waves in earth models with crust and upper mantle discontinuities-I. The case of one discontinuity..... 54 297
COOK A.H. On the constitution of the Moon's mantle..... 54 587
COWLEY J.A., MCELHINNY M.W. Palaeomagnetic directions and pole positions- XV. Pole numbers 15/1 to 15/232..... 52 259
CRAMPIN S. Seismic-wave propagation through a cracked solid: polarization as a possible dilatancy diagnostic..... 53 467

CROES M.K., BROWN F.H., SHUEY R.T. Magnetostratigrphy of the Shungura and Usno Formations, southwestern Ethiopia: new data and comprehensive reanalysis..... 54 519
CROUGH S. THOMAS Thermal origin of mid-plate hot-spot swells..... 55 451
DAGLEY P., MUSSETT A.E. Palaeomagnetism of the Fishnish dykes, Mull, Scotland..... 53 553
DAGLEY P., MUSSETT A.E., WILSON R.L., HALL J.M. The British Tertiary igneous province: palaeomagnetism of the Arran dykes..... 54 75
DAHLEN F.A., WOODHOUSE J.H. The effect of a general aspherical perturbation on the free oscillations of the Earth..... 53 335
DAHLEN F.A. Excitation of the normal modes of a rotating Earth model by an earthquake fault..... 54 1
DAHLEN F.A., FELS STEPHEN B. A physical explanation of the static core paradox..... 55 317

GEOPHYSICAL JOURNAL SUBJECT INDEX FOR THE YEAR 1978

BOOK REVIEWS
Physics of the Earth..... 52 365
The Archaean. (Search for the beginning)..... 52 366
Transient waves in viscoelastic media..... 52 531
Introduction to digital filtering in geophysics..... 53 669
Praxis der seismichen Feldmessung und Auswertung..... 53 669
The Moon- a new appraisal from space missions and laboratory analyses... 53 669
Lightning..... 54 731
Introduction to the mathematics of inversion in remote sensing and indirect measurements..... 54 732
The elements of wave propagation in a random medium..... 54 733
Atmospheric aerosols..... 54 733
Monitoring underground nuclear explosions..... 54 734
The permanent service for mean sea level..... 55 747
Seminar on geothermal energy Brussels 6,7 and 8, December 1977..... 55 748
Photographic atlas of the Mid-Atlantic Ridge rift valley..... 55 749
Developments in petroleum geology - I..... 55 750

COMPUTATIONAL METHODS
A modified first-motion approximation for the synthesis of body-wave seismograms, MELLMAN GEORGE R., HELMBERGER DONALD V..... 54 129
Improved boundary conditions for the numerical solution of E-polarization problems in geomagnetic induction, WEAVER J.T., BREWITT-TAYLOR C.R..... 54 309
A new method for computing synthetic seismograms, CHAPMAN C.H..... 54 481

DATA ANALYSIS
An objective method for smoothing palaeomagnetic data, CLARK R.M., THOMPSON R..... 52 205
Improved resolution of complex eigenfrequencies in analytically continued seismic spectra, BULAND RAY, GILBERT FREEMAN..... 52 457
Regional variations of higher Rayleigh-mode phase velocities: a spatial-filtering method, CARA MICHEL..... 54 439

DEFORMATION AND CREEP
On the elastic-perfectly plastic bending of the lithosphere under generalised loading with application to the Kuril trench, MCADOO D.C., CLADWELL J.G., TURCOTTE D.L..... 54 11
A note on the strains at a distance from an ellipsoidal inhomogeneity, BEAVAN JOHN..... 54 713

DYNAMICS OF THE EARTH
An optimal complex AR.MA model of the Chandler wobble, OOE M..... 53 445
The classical analysis of the response of a long baseline radio interferometer, CANNON W.H..... 53 503
Some difficulties in the theory of nutation, JEFFREYS HAROLD..... 54 711

EARTH TIDES
Detailed gravity-tide spectrum between one and four cycles per day, WARBURTON R.J., GOODKIND J.M..... 52 117
Modelling ocean-landing effects on tidal gravity in Australia, BRETREGER K., MATHER R.S..... 52 241
The bodily tide and the yielding of the Earth due to tidal loading, PEKERIS C.L..... 52 471
Tidal loading: crustal structure of Nova Scotia and the M2 tide in the northwest Atlantic from tilt and gravity observations, BEAUMONT C..... 53 27

Strain-tide spectroscopy, LEVINE JUDAH..... 54 27

EARTHQUAKES
Moment tensor inversions and source models, STRELITZ R.A..... 52 359
Frictional heating on a fault zone with finite thickness, CARDWELL R.K., CHINN D.S., MOORE G.F., TURCOTTE D.L..... 52 525
Energy release in faulting processes in a pre-stressed self-gravitating rotating Earth model, BONAFEDE M., BOSCHI E..... 53 79
Application of some dynamic properties of stick-slip to earthquakes, OHNAKA M..... 53 311
Excitation of the normal modes of a rotating Earth model by an earthquake fault, DAHLEN F.A..... 54 1
Subduction process of a fracture zone and aseismic ridges-the focal mechanism and source characteristics of the New Hebrides earthquake of 1969 January 19 and some related events, CHUNG WAI-YING, KANAMORI HIROO 54 221
Dynamical rupture process on a three-dimensional fault with non-uniform frictions and near-field seismic waves, MIKUMO TAKESHI, MIYATAKE TAKASHI..... 54 417
Perceptible earthquakes in the United Kingdom, BURTON PAUL W..... 54 475
Earthquake-source parameters related to magnitude, OHNAKA MITIYASU..... 55 45
Source mechanism of the deep Colombian earthquake of 1970 July 31 from the free oscillation data, MENDIGUREN JORGE A., AKI KEIITI..... 55 539
Volume and surface sources due to laterally varying boundaries of elastic homogeneous layers, JOBERT GEORGES, SUTEAU ANNE..... 55 669

EARTH'S CORE
Thermodynamical Gruneisen's function for pure iron at the Earth's core conditions, FAZIO D., MULGARGIA F., BOSCHI E..... 53 531
A physical explanation of the static core paradox, DAHLEN F.A., FELS STEPHEN B..... 55 317

EARTH'S LITHOSPHERE
A detailed rock magnetic and opaque mineralogy study of the basalts from the Nazca plate, JOHNSON PAUL H., HALL JAMES M..... 52 45
The upper mantle structure of the North Sea region from Rayleigh wave dispersion, STUART GRAHAM W..... 52 367
Microearthquakes near the eastern end of St. Paul's Fracture Zone, FRANCIS T.J.G., PORTER I.T., LILWALL R.C..... 53 201
The structure of King's Trough, Northeast Atlantic, from bathymetric, seismic and gravity studies, SEARLE R.C., WHITMARSH R.B..... 53 259
LISB-IV. Crustal structure of Northern Britain, BAMFORD D., NUNN K., PRODEHL C., JACOB B..... 54 43
LISB-V. Studies of crustal shear waves, ASSUMPCAO M., BAMFORD D..... 54 61
Geophysical surveys on the East Pacific Rise-Galapagos Rise system, ANDERSON ROGER N., HOBART MICHAEL A., VON HERZEN R.P., FORNARI DANIEL J..... 54 141
The Mid-Atlantic Ridge: structure at 45 degrees North, FOWLER C.M.R..... 54 167
Thickening model of the continental lithosphere, KONO YOSHITERU, AMANO MASAO..... 54 405
The Mid-Atlantic Ridge at 37 and 45 degrees North: some geophysical and petrological constraints, NISBET EUAN G., FOWLER C.MARY R..... 54 631
Inversion of surface-wave phase velocities for an anisotropic structure, SCHLUE J.W., KNOPOFF L..... 54 697
Joint interpretation of P-wave time and amplitude anomalies in terms of lithospheric heterogeneities, HADDON R.A.W., HUSEBYE E.S..... 55 19

EARTH'S MANTLE
A model of time-periodic mantle flow, BUSSE F.H..... 52 1
Magnetic induction field (2-30 cpd) on Hawaii Island and their implications regarding electrical conductivity in the oceanic mantle, KLEIN D.P., LARSEN J.C..... 53 61

Radial variation of compressional and shear velocities in the Earth's lower mantle, SENGUPTA M.K., JULIAN B.R. 54 185
Double-planed deep seismic zone and upper-mantle structure in the Northeastern Japan Arc, HASEGAWA AKIRA, UMINO NORIHITO, TAKAGI AKIO 54 281
A comparison of the upper-mantle structure beneath Eurasia and the North Atlantic and Arctic Oceans, ENGLAND P.C., KENNETT B.L.N., WORTHINGTON M.H. 54 575
Mixed-oxide and perovskite-structure model mantles from 700-1200 km, WATT J.PETER, O'CONNELL RICHARD 54 601
On imperfection of elasticity in the Earth's interior, JEFFREYS HAROLD.. 55 273
On high-frequency spheroidal modes and the structure of the upper mantle KENNETT B.L.N., WOODHOUSE J.H. 55 333
Thermal origin of mid-plate hot-spot swells, CROUGH S. THOMAS 55 451

ELASTIC WAVE THEORY
The Love wave scattering matrix for a continental margin (theoretical), KAZI M.H. 52 25
Dynamics in prestressed media with moving phase boundaries: a continuum theory of failure in solids, ARCHAMBEAU C.B., MINSTER J.B. 52 65
P-wave seismograms from continuously varying transition zones-I. Acoustic media, GODA M.A.A., RAO C.R.A. 52 165
P-wave seismograms from continuously varying transition zones- II. Elastic media, GODA M.A.A., RAO C.R.A. 52 183
Symmetries in the reflection and transmission of elastic waves, KENNETT B.L.N., KERRY N.J., WOODHOUSE J.H. 52 215
Moment tensor inversions and source models, STRELITZ R.A. 52 359
On transient sliding motion, BROBERG K.B. 52 397
Transient and impulse responses of a one-dimensional linearly attenuating medium-I. Analytical results, MINSTER J.B. 52 479
Transient and impulse responses of a one-dimensional linearly attenuating medium-II. A parametric study, MINSTER J.B. 52 503
Energy release in faulting processes in a pre-stressed self-gravitating rotating Earth model, BONAFEDE M., BOSCHI E. 53 79
Normal-mode representations of multiple-ray reflections in a spherical Earth, NOLET G., KENNETT B. 53 219
The Love wave scattering matrix for a continental margin (theoretical), KAZI M.H. 53 227
The fine structure of the normal incidence synthetic seismogram, ROBINSON E.A., TREITEL S. 53 289
Application of some dynamic properties of stick-slip to earthquakes, OHNAKA M. 53 311
The effect of a general aspherical perturbation on the free oscillations of the Earth, WOODHOUSE J.H., DAHLEN F.A. 53 335
Seismic-wave propagation through a cracked solid: polarization as a possible dilatancy diagnostic, CRAMPIN S. 53 467
On seismic-wave scattering by a rough core-mantle boundary, DOORNBOS D.J. 53 643
Possible mode conversion between Love and Rayleigh waves at a continental margin, GREGERSEN SOREN 54 121
Asymptotic results for elastodynamic propagator matrices in plane-stratified and spherically-stratified earth models, WOODHOUSE J.H. 54 263
Ray-mode duality for SH waves in earth models with crust and upper mantle discontinuities-I. The case of one discontinuity, WANG C., CLEARY J.R., ANDERSSEN R.S. 54 297
Scattering of horizontally-polarized shear waves by surface irregularities, SILLS LESLIE B. 54 319
On the scattering of SH waves from a point source by a sphere, ANSELL J.H. 54 349

Dynamical rupture process on a three-dimensional fault with non-uniform frictions and near-field seismic waves, MIKUMO TAKESHI, MIYATAKE TAKASHI..... 54 417
A physical explanation of the static core paradox, DAHLEN F.A., FELS STEPHEN B..... 55 317
On high-frequency spheroidal modes and the structure of the upper mantle KENNETT B.L.N., WOODHOUSE J.H..... 55 333
Volume and surface sources due to laterally varying boundaries of elastic homogeneous layers, JOBERT GEORGES, SUTEAU ANNE..... 55 669

ELECTRICAL PROPERTIES
The electrical conductivity of sandstone, limestone and granite, DUBA A. PIWINSKII A.J., SANTOR M., WEED H.C..... 53 583

ELECTROMAGNETIC INDUCTION
Oceanic induction and shifting the spectrum, KENDALL P.C..... 52 201
Limitations on the parameters of the solar wind in modelling lunar electromagnetic induction, HOBBS B.A., PARKER R.L..... 52 433
Some new ideas on induction in infinitely-conducting oceans of arbitrary shape, HEWSON-BROWNE R.C., KENDALL P.C..... 53 431
Electromagnetic response of an ocean-coast model to E-polarization induction, FISCHER G., SCHNEGG P.A., USADEL K.D..... 53 599
Improved boundary conditions for the numerical solution of E-polarization problems in geomagnetic induction, WEAVER J.T., BREWITT-TAYLOR C.R..... 54 309
Green's functions for modelling the EM response of a target near a dipping contact, RAICHE A.P..... 55 507
Electromagnetic induction in the Earth by moving ionospheric current systems, HERMANCE J.F..... 55 557
Induction in arbitrarily shaped oceans - III. Oceans of finite conductivity, HEWSON-BROWNE R.C..... 55 645
Two-dimensional induction in a thin sheet of variable integrated conductivity at the surface of a uniformly conducting Earth, GREEN V.R. WEAVER J.T..... 55 721

GEODESY
The classical analysis of the response of a long baseline radio interferometer, CANNON W.H..... 53 503
Oceanic loading on European laser-ranging sites, CHIARUTTINI C., LIVIERATOS E..... 54 593
Detailed 1X1 degree gravimetric Indian Ocean geoid and comparison with GEOS-3 altimeter geoid profiles, KAHLE HANS-GERT, CHAPMAN MICHAEL, TALWANI MANIK..... 55 703

GRAVITY FIELD EARTH
Reply by authors on comments by T.J.Ulrych on 'Three-dimensional statistical gravity disturbance model', NEGI J.G., DIMRI V.P..... 55 269
Numerical computation of the three-dimensional normal ellipsoidal field with a 1/100 m and 1/100 mgal accuracy, BOCCHIO F..... 55 503
Detailed 1X1 degree gravimetric Indian Ocean geoid and comparison with GEOS-3 altimeter geoid profiles, KAHLE HANS-GERT, CHAPMAN MICHAEL, TALWANI MANIK..... 55 703
A comment on depths of sources of anomalies in the Earth's gravity field GOODACRE A.K..... 55 745

GRAVITY METHODS AND SURVEYS
A microgravimetric network for secular gravity studies in Scotland, HIPKIN R.G..... 52 383
Gravity measurements in Kenya, SWAIN C.J., KHAN M.A..... 53 427

HEAT FLOW
Comparison of theoretical and observed temperature profiles in Devon Island ice cap, Canada, PATERSON W.S.B., CLARKE G.K.C..... 55 615

HYDROLOGY
A theory of slow fluid flow through a porous thermoelastic matrix, MORLAND L.W..... 55 393

INVERSE PROBLEM
A procedure for estimating lateral variations from low-frequency eigenspectra data, JORDAN THOMAS H..... 52 441
Resolution analysis for discrete systems, KENNETT B., NOLET G..... 53 413
On the information content of natural frequency spectra associated with different angular numbers, BARCILON V..... 53 623
The significance of isotropic inversion of surface-wave dispersion, KIRKWOOD S.C..... 55 131
The inverse eigenvalue problems of free oscillation data inversion: the Backus-Gilbert conjecture for angular-order spectra, ANDERSSEN R.S., CHANDLER G.A..... 55 311
Inversion of Love-wave data for velocity and anelasticity using exact kernels, SILVA WALTER..... 55 363
Some aspects of non-linearity in inversion, KENNETT B.L.N..... 55 373
Simultaneous inversion of seismic data, NOLET GUUST..... 55 679

IONOSPHERE
Electromagnetic induction in the Earth by moving ionospheric current systems, HERMANCE J.F..... 55 557

MAGNETIC FIELD EARTH
Observational constraints on the generation process of the Earth's magnetic field- correction, GUBBINS D..... 53 113
The pole-tide signal in the geomagnetic field at a low-latitude station, RAO D.R.K., RANGARAJAN G.K..... 53 617
The gravitationally powered dynamo, LOPER DAVID E..... 54 389
A study of geomagnetic storms, PERREAULT PAUL, AKASOFU S.-I..... 54 547
A definitive model of the geomagnetic field and its secular variation for 1965 -I. Derivation of model and comparison with the IGRF, BARRACLOUGH D.R., HARWOOD J.M., LEATON B.R., MALIN S.R.C..... 55 111
Lunar daily geomagnetic variations at Tucson, SCHLAPP D.M..... 55 183
The annual and daily variations of the Dst index, MAYAUD P.N..... 55 193

MAGNETIC METHODS AND SURVEYS
A study of two polar magnetic substorms with a two-dimensional magnetometer array, BANNISTER J.R., GOUGH D.I..... 53 1
Magnetic induction field (2-30 cpd) on Hawaii Island and their implications regarding electrical conductivity in the oceanic mantle, KLEIN D.P., LARSEN J.C..... 53 61
Investigation of geomagnetic-field secular variation around the Sverdlovsk magnetic observatory, SHAPIRO V.A., IVANOV N.A., IVANOVA L.N..... 53 497
A polar magnetic substorm observed in the evening sector with a two-dimensional magnetometer array, GOUGH D.I., BANNISTER J.R..... 55 435

MAGNETIC PROPERTIES
Magnetic properties of dredged oceanic gabbros and the source of marine magnetic anomalies, KENT D.V., HONNOREZ B.M., OPDYKE N.D., FOX P.J..... 55 513

MAGNETOSPHERE
High-latitude, ground-based observations of ULF plasma waves in the magnetosphere, SAMSON J.C..... 53 319

MAGNETO-TELLURIC METHODS AND SURVEYS
Geomagnetic sounding of Eastern North America and the White Mountain heat flow anomaly, BAILEY R.C., EDWARDS R.N., GARLAND G.D., GREENHOUSE J.P..... 55 499

MARINE GEOPHYSICS
Geophysical surveys on the East Pacific Rise-Galapagos Rise system, ANDERSON ROGER N., HOBART MICHAEL A., VON HERZEN R.P., FORNARI DANIEL J..... 54 141
The Mid-Atlantic Ridge: structure at 45 degrees North, FOWLER C.M.R..... 54 167
The Mid-Atlantic Ridge at 37 and 45 degrees North: some geophysical and petrological constraints, NISBET EUAN G., FOWLER C.MARY R..... 54 631
Ocean-bottom seismograph observations on the Mid-Atlantic Ridge near 45 degrees North - further results, LILWALL R.C., FRANCIS T.J.G, PORTER I.T..... 55 255

MOON STRUCTURE
Limitations on the parameters of the solar wind in modelling lunar electromagnetic induction, HOBBS B.A., PARKER R.L..... 52 433
On the constitution of the Moon's mantle, COOK A.H..... 54 587

NORMAL MODES OF THE EARTH
A procedure for estimating lateral variations from low-frequency eigenspectra data, JORDAN THOMAS H..... 52 441
Improved resolution of complex eigenfrequencies in analytically continued seismic spectra, BULAND RAY, GILBERT FREEMAN..... 52 457
Normal-mode representations of multiple-ray reflections in a spherical Earth, NOLET G., KENNETT B..... 53 219
The effect of a general aspherical perturbation on the free oscillations of the Earth, WOODHOUSE J.H., DAHLEN F.A..... 53 335
Measurements and interpretation of normal mode attenuation, SAILOR R.V., DZIEWONSKI A.M..... 53 559
Excitation of the normal modes of a rotating Earth model by an earthquake fault, DAHLEN F.A..... 54 1
The inverse eigenvalue problems of free oscillation data inversion: the Backus-Gilbert conjecture for angular-order spectra, ANDERSSEN R.S., CHANDLER G.A..... 55 311
On high-frequency spheroidal modes and the structure of the upper mantle KENNETT B.L.N., WOODHOUSE J.H..... 55 333
Source mechanism of the deep Colombian earthquake of 1970 July 31 from the free oscillation data, MENDIGUREN JORGE A., AKI KEIITI..... 55 539

OCEANOGRAPHY
The quarter-diurnal tide in the English Channel, HAMILTON J..... 53 541
Some experiments with 'orthotides' , ALCOCK G.A., CARTWRIGHT D.E..... 54 681
Self-consistent equilibrium ocean tides, AGNEW DUNCAN CARR, FARRELL W.E. 55 171
The interaction of surge and tide in the North Sea and River Thames, PRANDLE D., WOLF J..... 55 203

PALAEOMAGNETISM
Effect of compaction on the acquisition of a detrital remanent magnetization in fine-grained sediments, BLOW R.A., HAMILTON N..... 52 13
A detailed rock magnetic and opaque mineralogy study of the basalts from the Nazca plate, JOHNSON PAUL H., HALL JAMES M..... 52 45
Palaeomagnetism of some Late Cretaceous and Miocene igneous rocks on Jamaica, GUJA N.H., VINCENZ S.A..... 52 97
An objective method for smoothing palaeomagnetic data, CLARK R.M., THOMPSON R..... 52 205
Palaeomagnetic directions and pole positions- XV. Pole numbers 15/1 to 15/232, MCELHINNY M.W., COWLEY J.A..... 52 259

Multivectorial magnetization in late Palaeozoic volcanics from North Sardinia; partial remagnetization and rotation, STORETVEDT K.M., MARKHUS L.A..... 53 245
Palaeomagnetic survey of the (Palaeozoic) Shelve inlier and Berwyn Hills, Welsh Borderlands, PIPER J.D.A..... 53 355
Palaeomagnetic record of a late Tertiary field reversal, DODSON R., DUNN J.R., FULLER M., WILLIAMS I., ITO H., SCHMIDT V.A., WU Y.-M..... 53 373
Palaeomagnetism of the Fishnish dykes, Mull, Scotland, DAGLEY P., MUSSETT A.E..... 53 553
The British Tertiary igneous province: palaeomagnetism of the Arran dykes, DAGLEY P., MUSSETT A.E., WILSON R.L., HALL J.M..... 54 75
Reliability of palaeointensity methods using alternation field demagnetization and anhysteretic remanence, KONO MASARU..... 54 241
Magnetostratigrphy of the Shungura and Usno Formations, southwestern Ethiopia: new data and comprehensive reanalysis, BROWN F.H., SHUEY R.T. CROES M.K..... 54 519
Palaeomagnetism of alkaline lava flows from El Salto-Almafuerte, Cordoba Province, Argentina, MENDIA JOSE E..... 54 539
Palaeomagnetism of the Nexo Sandstone from Bornholm Island, Denmark, PRASAD S.N., SHARMA P.V..... 54 669
Upper Cretaceous palaeomagnetic stratigraphy at Moria (Umbrian Apennines,Italy): verification of the Gubbio section, ALVAREZ WALTER, LOWRIE WILLIAM..... 55 1
Remanent magnetization of Precambrian and Cretaceous kimberlites in South Africa, ITO H., TOKIEDA K., SUWA K., KUME S..... 55 123
Palaeomagnetism and K-Ar age of the Upper Ordovician Alcaparrosa Formation, Argentina, VILAS JUAN F., VALENCIO DANIEL A..... 55 143
The rock magnetism of the Mississippian Madison Limestone north-central Wyoming, BESKE-DIEHL SUZANNE, SHIVE PETER N..... 55 351
Magnetic properties of dredged oceanic gabbros and the source of marine magnetic anomalies, KENT D.V., HONNOREZ B.M., OPDYKE N.D., FOX P.J..... 55 513

PHASE EQUILIBRIA
Dynamic behaviour of a phase boundary under non-uniform surface loads, MARESCHAL JEAN-CLAUDE..... 54 703

PHYSICS OF ROCKS
On the use of the stress relaxation testing method in studies of the mechanical behaviour of geological materials, RUTTER E.H., ATKINSON B.K., MAINPRICE D.H..... 55 155
The generalization of the Mie-Gruneisen equation of state, MULARGIA F., BOSCHI E..... 55 263
Experimental study of the origin and properties of the defect moment in single domain haematite, BUCUR ILEANA..... 55 589

SEISMIC METHODS AND SURVEYS
LISB-IV. Crustal structure of Northern Britain, BAMFORD D., NUNN K., PRODEHL C., JACOB B..... 54 43
LISB-V. Studies of crustal shear waves, ASSUMPCAO M., BAMFORD D..... 54 61
Use of a bubble tiltmeter as a horizontal seismometer, MILLER WAYNE F., GELLER ROBERT J., STEIN SETH..... 54 661
Hypocentral resolution of small ocean bottom seismic networks, LILWALL R.C., FRANCIS T.J.G..... 54 721
A long-range, controlled source seismic profile in Northern Australia, HALES A.L., RYNN J.M.W..... 55 633

SEISMICITY
Statistical study of the occurrence of shallow earthquakes, KAGAN YAN, KNOPOFF LEON..... 55 67
An earthquake swarm on the Chagos-Laccadive Ridge and its tectonic implications, STEIN SETH..... 55 577

Non-linear stochastic models for seismic events with applications in event identification, DARGAHI-NOUBARY G.R., LAYCOCK P.J., SUBBA RAO T.. 55 655
Simultaneous inversion of seismic data, NOLET GUUST..... 55 679
Seismicity within a zone of plate convergence - the Wellington region, New Zealand, ROBINSON RUSSELL..... 55 693

SEISMOLOGY

P-wave seismograms from continuously varying transition zones-I. Acoustic media, GODA M.A.A., RAO C.R.A..... 52 165
P-wave seismograms from continuously varying transition zones- II. Elastic media, GODA M.A.A., RAO C.R.A..... 52 183
Body-wave spectral structure of 14 earthquakes with mb greater than 6.0 determined from long-period records of WWSSN stations for 1964-74, ZAMANI A., MURRELL S.A.F..... 52 231
The upper mantle structure of the North Sea region from Rayleigh wave dispersion, STUART GRAHAM W..... 52 367
Generation of complete theoretical seismograms for SH- III, MANTOVANI E. 53 55
Study of the seismic velocity ratio for several regions of the South Island, New Zealand: evaluation of regional t(S)/t(P) and near source V(P)/V(S) values, RYNN J.M.W., SCHOLZ C.H..... 53 87
The relocation of epicentres in Iran, AMBRASEYS N.N..... 53 117
Rayleigh-wave amplitudes from earthquakes in the range 0-150 degrees, THOMAS J.H., MARSHALL P.D., DOUGLAS A..... 53 191
Microearthquakes near the eastern end of St. Paul's Fracture Zone, FRANCIS T.J.G., PORTER I.T., LILWALL R.C..... 53 201
The fine structure of the normal incidence synthetic seismogram, ROBINSON E.A., TREITEL S..... 53 289
The GH branch of PKP from deep-focus earthquakes, AGRAWAL R.C..... 53 459
Seismic-wave propagation through a cracked solid: polarization as a possible dilatancy diagnostic, CRAMPIN S..... 53 467
On seismic-wave scattering by a rough core-mantle boundary, DOORNBOS D.J..... 53 643
Observed very long period Rayleigh-wave phase velocities across the Canadian shield, OKAL E.A..... 53 663
Possible mode conversion between Love and Rayleigh waves at a continental margin, GREGERSEN SOREN..... 54 121
A modified first-motion approximation for the synthesis of body-wave seismograms, MELLMAN GEORGE R., HELMBERGER DONALD V..... 54 129
Radial variation of compressional and shear velocities in the Earth's lower mantle, SENGUPTA M.K., JULIAN B.R..... 54 185
Asymptotic results for elastodynamic propagator matrices in plane-stratified and spherically-stratified earth models, WOODHOUSE J.H..... 54 263
Ray-mode duality for SH waves in earth models with crust and upper mantle discontinuities-I. The case of one discontinuity, WANG C., CLEARY J.R., ANDERSSEN R.S..... 54 297
Scattering of horizontally-polarized shear waves by surface irregularities, SILLS LESLIE B..... 54 319
On the scattering of SH waves from a point source by a sphere, ANSELL J.H..... 54 349
Regional variations of higher Rayleigh-mode phase velocities: a spatial-filtering method, CARA MICHEL..... 54 439
S times from deep-focus Indian earthquakes, AGRAWAL R.C..... 54 461
A new method for computing synthetic seismograms, CHAPMAN C.H..... 54 481
A comparison of the upper-mantle structure beneath Eurasia and the North Atlantic and Arctic Oceans, ENGLAND P.C., KENNETT B.L.N., WORTHINGTON M.H..... 54 575
Inversion of surface-wave phase velocities for an anisotropic structure, SCHLUE J.W., KNOPOFF L..... 54 697

A note on the strains at a distance from an ellipsoidal inhomogeneity, BEAVAN JOHN..... 54 713
Joint interpretation of P-wave time and amplitude anomalies in terms of lithospheric heterogeneities, HADDON R.A.W., HUSEBYE E.S..... 55 19
The significance of isotropic inversion of surface-wave dispersion, KIRKWOOD S.C..... 55 131
Ocean-bottom seismograph observations on the Mid-Atlantic Ridge near 45 degrees North - further results, LILWALL R.C., FRANCIS T.J.G, PORTER I.T..... 55 255
On imperfection of elasticity in the Earth's interior, JEFFREYS HAROLD.. 55 273
S-wave travel times for a spherically averaged Earth, UHRHAMMER ROBERT.. 55 283
Inversion of Love-wave data for velocity and anelasticity using exact kernels, SILVA WALTER..... 55 363
The design of miniature wideband seismometers, USHER M.J., CURALP C., BURCH R.F..... 55 605
On the focusing of seismic body waves at the epicentre's antipode, RIAL J.A..... 55 737

TECTONICS
A model of time-periodic mantle flow, BUSSE F.H..... 52 1
Present tectonics and Late Cenozoic evolution of New Zealand, WALCOTT R.I..... 52 137
The northward motion of India since the Late Cretaceous, PEIRCE J.W..... 52 277
Evolution of the Labrador Sea and its bearing on the early evolution of the North Atlantic, SRIVASTAVA S.P..... 52 313
On the elastic-perfectly plastic bending of the lithosphere under generalised loading with application to the Kuril trench, MCADOO D.C., CLADWELL J.G., TURCOTTE D.L..... 54 11
Shear deformation zones along major transform faults and subducting slabs, YUEN D.A., FLEITOUT L., SCHUBERT G., FROIDEVAUX C..... 54 93
Subduction process of a fracture zone and aseismic ridges-the focal mechanism and source characteristics of the New Hebrides earthquake of 1969 January 19 and some related events, CHUNG WAI-YING, KANAMORI HIROO 54 221
Double-planed deep seismic zone and upper-mantle structure in the Northeastern Japan Arc, HASEGAWA AKIRA, UMINO NORIHITO, TAKAGI AKIO.... 54 281
Asthenosphere flow and plate motions, HARPER J.F..... 55 87
Active tectonics of the Alpine-Himalayan belt: the Aegean Sea and surrounding regions, MCKENZIE DAN..... 55 217
Stress and temperature in subduction shear zones: Tonga and Mariana, BIRD PETER..... 55 411
Thermal origin of mid-plate hot-spot swells, CROUGH S. THOMAS..... 55 451
The evolution of sedimentary basins on a viscoelastic lithosphere: theory and examples, BEAUMONT CHRISTOPHER..... 55 471
An earthquake swarm on the Chagos-Laccadive Ridge and its tectonic implications, STEIN SETH..... 55 577
Seismicity within a zone of plate convergence - the Wellington region, New Zealand, ROBINSON RUSSELL..... 55 693

UKGA ABSTRACTS
UK Geophysical Assembly Supplement..... 53 123
